

North Ayrshire Council
Comhairle Siorrachd Àir a Tuath

Police and Fire and Rescue Committee

A Meeting of the **Police and Fire and Rescue Committee** of North Ayrshire Council will be held in the **Council Chambers, Ground Floor, Cunninghame House, Irvine, KA12 8EE** on **Monday, 10 June 2024** at **14:00** to consider the undernoted business.

Meeting Arrangements - Hybrid Meetings

This meeting will be held on a predominantly physical basis but with provision, by prior notification, for remote attendance by Elected Members in accordance with the provisions of the Local Government (Scotland) Act 2003. Where possible, the meeting will be live-streamed and available to view at <https://north-ayrshire.public-i.tv/core/portal/home>.

1 Declarations of Interest

Members are requested to give notice of any declarations of interest in respect of items of business on the Agenda.

2 Minutes

The accuracy of the Minutes of the meeting held on 26 February 2024 will be confirmed and the Minutes signed in accordance with Paragraph 7 (1) of Schedule 7 of the Local Government (Scotland) Act 1973 (copy enclosed).

3 Scottish Fire and Rescue Service Performance and Service Update

Submit report by the Scottish Fire and Rescue Service on performance in relation to the North Ayrshire Local Fire and Rescue Plan (copy enclosed).

4 Police Scotland Performance Update

Submit report by Police Scotland on performance in relation to the North Ayrshire Local Policing Plan (copy to follow).

- 5 Scottish Fire and Rescue Service Strategic Review Online Survey**
There will be a verbal update by the Scottish Fire and Rescue Service in respect of the above.
- 6 Presentation by Scottish Fire and Rescue Service (SFRS) on recent Kilwinning battery recycling centre incident**
There will be a short presentation by SFRS on the above, followed by an opportunity for Members to ask questions.
- 7 Urgent Items**
Any other items which the Chair considers to be urgent.

Webcasting

Please note: this meeting may be filmed/recorded/live-streamed to the Council's internet site and available to view at <https://north-ayrshire.public-i.tv/core/portal/home>, where it will be capable of repeated viewing. At the start of the meeting, the Provost/Chair will confirm if all or part of the meeting is being filmed/recorded/live-streamed.

You should be aware that the Council is a Data Controller under the Data Protection Act 2018. Data collected during the webcast will be retained in accordance with the Council's published policy, including, but not limited to, for the purpose of keeping historical records and making those records available via the Council's internet site.

Generally, the press and public seating areas will not be filmed. However, by entering the Council Chambers, using the press or public seating area or (by invitation) participating remotely in this meeting, you are consenting to being filmed and consenting to the use and storage of those images and sound recordings and any information pertaining to you contained in them for webcasting or training purposes and for the purpose of keeping historical records and making those records available to the public. If you do not wish to participate in a recording, you should leave the meeting. This will constitute your revocation of consent.

If you have any queries regarding this and, in particular, if you believe that use and/or storage of any particular information would cause, or be likely to cause, substantial damage or distress to any individual, please contact dataprotectionofficer@north-ayrshire.gov.uk.

Police and Fire and Rescue Committee Sederunt

Donald Reid (Chair)
Stewart Ferguson (Vice-Chair)
Scott Davidson
Amanda Kerr
Jean McClung
Davina McTiernan
Donald L. Reid
Angela Stephen
John Sweeney
Vacancy

Chair:

Apologies:

Attending:

At a Meeting of the Police and Fire and Rescue Committee of North Ayrshire Council at 2.00 p.m. involving a combination of participation by remote electronic means and physical attendance within the Council Chambers, Irvine.

Present (Physical Participation)

Donald Reid, Jean McClung, Davina McTiernan, Donald L. Reid and John Sweeney.

Present (Remote Attendance)

Scott Davidson.

In Attendance

Wallace Turpie, Senior Manager (Waste Resources – Operations) (Place); R. Lynch, Senior Manager Legal Services, C. Cochrane, Solicitor (Legal Services) and C. Stewart and D. McCaw, Committee Services Officers (Chief Executive’s Service).

Also In Attendance

Chief Superintendent R. Higgins and Chief Inspector F. Normansell (Police Scotland); and Area Commander I. McMeekin (Scottish Fire and Rescue Service).

Chair

Councillor Donald Reid in the Chair.

Apologies

Stewart Ferguson and Angela Stephen.

1. Declarations of Interest

There were no declarations of interest by Members in terms of Standing Order 11 and Section 5 of the Code of Conduct for Councillors.

2. Minutes

The Minutes of the Meeting of the Police and Fire and Rescue Committee held on 13 November 2023 were confirmed and the Minutes signed in accordance with Paragraph 7 (1) of Schedule 7 of the Local Government (Scotland) Act 1973.

3. Scottish Fire and Rescue Service Performance and Service Update

Submitted report by the Scottish Fire and Rescue Service (SFRS) which provided statistical information on progress against the North Ayrshire Local Fire and Rescue Plan for the period 1 April 2023 – 31 December 2023. The report provided an analysis of the performance across six indicators, using the rolling three-year average as a basis of measuring performance, together with a summary of priorities and current activity. Additional contextual information was provided by Area Commander McMeekin to the meeting.

An update was provided in relation to the decision to pause the Local Fire and Rescue Plan review until budget implications were fully known, with the 6 current local priorities continuing to be a focus to meet the needs of the North Ayrshire area. Consultation on the future priorities of the Scottish Fire and Rescue Service would commence at the end of March 2024 through engagement with Elected Members and Council officials.

Members asked questions and were provided with further information in relation to:-

- the role of home safety fire visits to highlight areas of concern through appropriate referral pathways;
- the risks and impact of deliberate fire setting in the Irvine West and Saltcoats and Stevenston areas;
- future joint action plans to tackle deliberate fire setting, including the ongoing work of the Council's Environmental Enforcement Team;
- the criteria regarding fire appliance attendance at road traffic incidents;
- risk management in connection with electric vehicle fires;
- retained duty system contracts and statistics; and
- unintentional injury or harm figures.

The Chair advised that the Committee would be happy to consult with the Area Commander on the future priorities of the Scottish Fire and Rescue Service and, if time allowed, that the consultation could be extended to all Members of the Council.

Noted.

4. Police Scotland Performance Update

Submitted report by Police Scotland on performance in relation to the North Ayrshire Local Policing Plan for the period 1 April 2023 – 31 December 2023. A summary of current local policing plan priorities was also detailed.

The report provided information on North Ayrshire's performance, including a 6.2% increase in the total number of crimes. The report further outlined progress in the areas of serious crime, violence against women and girls, safer communities, community wellbeing, road safety and public confidence. Additional contextual information was provided by Chief Superintendent Higgins to the meeting.

Members asked questions and were provided with further information in relation to:-

- laws affecting owners to ensure their dogs were kept under control when not on a lead;
- measures to tackle the significant increase in detection and reporting rates for shoplifting in supermarkets in the North Ayrshire area;
- related links between shoplifting and youth disorder;
- the increase in violent crime primarily due to the number of minor assaults both on emergency workers and the public;

- whether any incidents were attributable to changes in street lighting on roads and footpath areas;
- the potential for Police quad bikes to be deployed to the Lochshore area of Kilbirnie during the forthcoming summer months;
- the routine carrying of tasers by trained Police Scotland officers;
- the Challenge 25 policy utilised by licence-holders;
- the use of future test purchasing initiatives as an additional tool to prevent illegal underage alcohol sales being reported by Police Scotland in future Committee reports;
- clarification on road traffic offences dealt with by Police Scotland and DPE provisions enabling NAC enforcement officers to administer parking penalties; and
- whether details of on duty officer totals could be quantified within future information provided to Committee.

The Chair advised that the Committee would be happy to consult with the Chief Superintendent on the future priorities for the next Policing Plan and also in connection with any requirement to amend timing of reports to Committee in line with Police Scotland reporting timelines.

Noted.

5. Update Reports: Operation Moonbeam

Submitted reports in relation to the North Ayrshire approach to Operation Moonbeam during October and November 2023 and on partnership work undertaken to identify problematic areas and tackle illegal bonfire locations in relation to reducing risks to communities.

Information was also provided in relation to offences against emergency services personnel responding to incidents and the main hotspot areas which were challenging in terms of the level of crime and incidents.

The Committee was also advised of work undertaken with Trading Standards to ensure retailers were aware of the new legislation in terms of the Fireworks and Pyrotechnic Articles (Scotland) Act 2022 where Local Authorities had the ability to designate particular areas as a Firework Control Zone. Ongoing work was taking place to determine whether to designate any areas as Firework Control Zones in terms of this new legislation.

Members asked questions and were provided with further information in relation to:-

- individual and organised displays where public entertainment licences were not obtained;
- the number of locations where materials were unable to be removed due to the timing of intimation and availability of resources;
- weekend collection of combustible materials with the potential to cause storage and disposal issues and risks of fires at depots;
- finance costs for removal of materials; and

- the knock-on effect on customer service requests as a result of the clear-up exercise following bonfire night.

The Chair intimated thanks to all services for the partnership working approach taken in connection with Operation Moonbeam.

The Committee agreed (a) that a standing item be added to future Agendas in connection with preparation and follow up in relation to Operation Moonbeam; and (b) otherwise, to note the content of the report.

6. Valedictory

The Chair, on behalf of the Committee, took the opportunity to thank Diane McCaw, Committee Services Officer, for the work undertaken by her with North Ayrshire Council and its predecessor, Cunninghame District Council, and wished her a long and happy retirement.

The meeting ended at 4.00 p.m.

Police & Fire and Rescue Committee – 10 June 2024

Subject	Performance Report and Service updates
Purpose	To advise members of the Police and Fire Committee as to progress against North Ayrshire's Local Fire and Rescue Plan and to provide committee members with other key Fire and Rescue Service updates.
Recommendation	For members to note the information contained within this report

1. Introduction

- 1.1 The Scottish Fire and Rescue Service (SFRS) is legally obliged to produce Local Fire and Rescue Plans for all 32 local authorities across Scotland. The Local Fire and Rescue Plan for North Ayrshire was developed and, following a public consultation, was presented to North Ayrshire Council for formal approval.
- 1.2 The priorities contained within the current North Ayrshire Local Fire and Rescue Plan were formally approved at the full Council. The continuation of these priorities has been agreed for future reference, via the Police & Fire and Rescue Committee, and will be subject to ongoing monitoring via this forum.

2. Performance Summary

- 2.1 An analysis of operational responses across North Ayrshire for the period 1 April 2023 to 31 March 2024 identified a 7.7% decrease in activity levels when compared to the previous fiscal reporting period. A further review of activity over the rolling three years average indicates a 0.5% decrease in operational demand over the agreed recording period.
- 2.2 In reviewing operational activity on a broader level, false alarms accounted for 57.1% of all demand, with fire related and special service activity accounting for 26.2% and 16.7% respectively.
- 2.3 For the period 1 April 2023 to 31 March 2024, overall progress is being monitored across six indicators, using the three-year rolling average as a basis of measuring performance. Year on year and the rolling five-year average figures are also used to review short and long terms changes in demand and trends.
- 2.4 Utilising the defined approach in Section 4.3, review of performance against these indicators identified two are above and four are below the three-year average.

- 2.5 Further analysis of this performance is provided within the accompanying performance report (Appendix A).

3. SFRS Updates

- 3.1 Chief Officer Ross Haggart has informed the Board of the SFRS of his intention to retire from his position later this year. A competitive process to identify a new Chief Officer will commence in the near future.
- 3.2 The SFRS has launched an online survey to inform future changes to the organisation. This is the first stage in the organisation's engagement with communities, staff, representative bodies, partners and elected members as it considers implementing changes to the emergency services it delivers across Scotland.

This survey opened on 29 April and will close on 30 June 2024. A copy of the accompanying information pack and a link to the online survey are attached (Appendix B) and enclosed for the Police & Fire and Rescue Committee's consideration:

- <https://firescotland.citizenspace.com/planning-and-performance/shaping-our-future-service-your-say/>
- 3.3 On Monday 7 April 2024, the SFRS responded to a commercial building fire in the Byrehill Place area of Kilwinning. This incident attracted a Level 2 Response (six fire appliances and various supporting resources) and required the SFRS to remain in attendance for a period of seven days.

An overview of the SFRS's response to this incident (containing non-personal and non-commercially sensitive only) will be presented to the Police & Fire and Rescue Committee at its meeting on Monday 10 June 2024.

4. Proposal

- 4.1 It is proposed that members of the Police & Fire and Rescue Committee:
- a) Note the contents of the performance summary and associated report for the period.
 - b) Note the SFRS updates.

5. Implications

- 5.1 No implications have been identified at this time in respect of service delivery within North Ayrshire.

6. Conclusion

- 6.1 Fire and Rescue Service activity is subject to regular monitoring and review by North Ayrshire Council's Police & Fire and Rescue Committee. The contents of this

document, and accompanying performance report, forms part of this monitoring process.

- 6.2 Members of the Police & Fire and Rescue Committee will be kept up to date on progress against the Local Fire and Rescue Plan and to any future fire and rescue service updates as they arise.

Area Commander Ian McMeekin

Local Fire and Rescue Service Plan Priorities

The Local Fire and Rescue Service Plan has been developed to set out the priorities and objectives within North Ayrshire and allows our local authority partners to scrutinise the performance outcomes of these priorities. We will continue to work closely with our partners in North Ayrshire to ensure we are all “Working Together for a Safer Scotland” through targeting risks to our communities at a local level.

The plan has been developed to complement key partnership activity embedded across North Ayrshire's Community Planning Partnership. Through effective and co-ordinated partnership working we will seek to deliver continuous improvement in our performance and effective service delivery in our area of operations.

The Local Fire and Rescue Plan for North Ayrshire identified six areas for demand reduction and is subject to regular monitoring and reporting through the Police & Fire and Rescue Committee. A summary of the priorities and current activity is detailed below with further detail and analysis contained within this performance report.

	Accidental Dwelling Fires	Accidental Dwelling Fire Casualties	Unintentional Injury and Harm	Deliberate Fire Setting	Non-Domestic Fire Safety	Unwanted Fire Alarm Signals

About the statistics within this report

The activity totals and other statistics quoted within this report are published in the interests of transparency and openness. They are provisional in nature and subject to change as a result of ongoing quality assurance and review. Because all statistics quoted are provisional there may be a difference in the period totals quoted in our reports after local publication which result from revisions or additions to the data in our systems. The Scottish Government publishes official statistics each year which allow for comparisons to be made over longer periods of time.

-  Activity levels have reduced by more than 5%
-  Activity levels have reduced by up to 5%
-  Activity levels have increased overall

Glossary of Terms

Term - What it means

ADF

Accidental Dwelling Fire

CSET

Community Safety Engagement Toolkit is an internal IT system used to record home fire safety visits and community safety activities

FSET

Fire Safety Experiential Training is a bespoke training programme developed by the Scottish Fire and Rescue Service in Ayrshire and delivered to community planning partners to raise awareness of fire safety within the domestic environment

HFSV

Home Fire Safety Visit

PDIR

Post Domestic Incident Response, a term used by Prevention and Protection Directorate to indicate actions taken following attendance at a fire or other incident in the home. PDIRs include amongst things the offer of a free follow-up home fire safety visit

Primary Fires

These include all fires in buildings, vehicles and outdoor structures or any fire involving casualties, rescues or fires attended by five or more appliances

RDS

Retained Duty System. Professional on call firefighters who may have other primary employment responsibilities outside the Fire and Rescue Service but respond to emergency calls within their local area as and when required

RTC

Road Traffic Collision

Secondary Fires

These are the majority of outdoor fires including grassland and refuse fires unless they involve casualties or rescues, property loss or fire or more appliances attend. They include fires in single derelict buildings

Special Service

Calls to incidents which are not fires or false alarms such as RTCs, rescues, flooding, incidents involving hazardous materials or the provision of assistance to other agencies

UFAS

Unwanted Fire Alarm Signals. When an automatic fire detection and alarm system is activated as a result of anything other than an actual fire the activation is classed as a false alarm. If an attendance is made to such an event by the Scottish Fire and Rescue Service, then the event is recorded as an UFAS incident

1 INTRODUCTION

We have a proud history of serving our communities and have always worked hard to keep people safe.

The role of the firefighter has evolved over time and we want to build on this success to be a modern fire and rescue service that is ready for the challenges of Scotland's future.

As we outlined in our Long Term Vision, we want to do more for our communities – not just by responding to incidents but by stopping them from happening in the first place.

The types of incidents we respond to are changing and different parts of Scotland need different services from us. This means we need to change how we work.

For example, we are seeing fewer house fires but more flooding and wildfire incidents – often in areas that do not have permanently staffed fire stations.

Where we do have stations, some are located in areas to support historical risks that are no longer there – such as heavy industry like shipyards or coal mines. Some of our stations are also no longer fit for purpose and require significant investment to make them safer and more suitable for our staff.

To make sure we have the right resources in the right place at the right time we need to change. We believe the status quo is no longer an option.

This is why we are developing a Strategic Service Review Programme (SSRP) to look at how we deliver our services to become the modern service Scotland needs.

There are different ways to do this and we have outlined some of the areas we could change in this booklet.

But we need your help to make sure we get this right for the communities we serve.

This is the first stage in our engagement with staff, communities, trade unions, partners, elected representatives and people across Scotland. We will be running events and speaking to communities over the next two months to find out what you want and need from your fire and rescue service.

You can also complete our online survey or return our questionnaire on [page 21](#).

The views we gather will help us to develop change options for full public consultation later this year.

2

WHAT WE DO

At any given time, we can send our firefighters to any incident across Scotland.

We have specialist appliances and resources that are used across Scotland. These appliances are crewed by firefighters from local community fire stations, but they provide specific skills and equipment to support complex emergencies across the whole country.

We respond to every emergency and will always send the nearest appropriate and available appliances based on their location and the type of incident.

But keeping people safe starts long before any 999 call is made and our role is to prevent an emergency incident or harm from happening in the first place.

We have a proven track record in delivering effective prevention activity across a

wide range of issues. This means helping people to make their homes and communities safer.

We also regulate businesses and workplaces to ensure that the places we visit or work in are safe from fire.

We support all of Scotland's communities, from educating children and young people, through to supporting adults and older people to live safely and independently.

As a service, we exist to make Scotland a safer place. We do this by:

Responding to fires

Promoting fire safety

Enforcing fire legislation

Responding to road traffic collisions

Responding to serious transport incidents

Responding to serious flooding

Undertaking inland water rescue

Dealing with structural collapse of buildings

Responding to chemical, biological and nuclear incidents

Carrying out rescues at height

3

WHY WE NEED TO CHANGE

Scotland is changing and this means we are responding to different types of incidents.

We want to ensure communities are resilient and safe from extreme weather events, such as flooding and wildfires.

Our communities are changing too with more people living longer at home. Some people are vulnerable and require additional support so we need to adapt to meet these needs.

We know we can do more to keep Scotland safe. We want to focus on prevention so we can reduce demand on us and other public services.

This means considering how we can develop our prevention work through the use of our people, technology and safety interventions, making communities, homes and businesses safer and more resilient.

We are also committed to reducing our carbon footprint which means investing in more energy efficient buildings and vehicles.

3.1 What we respond to

Fires still make up the majority of incidents we attend. But the number of fires has reduced over time. This includes house fires and other building fires.

While fires overall have decreased, the number of other incidents we attend has increased.

Non-fire incidents increased from 11% in 2013-14 to 17% last year of the total incidents we attended. We expect this rise to continue.

At the same time, we have witnessed a continued reduction in fire-related deaths and casualties.

2022/23 STATISTICS

* Incident statistics of this type are not held for 2003/04

6 SHAPING OUR FUTURE SERVICE: YOUR SAY

Wildfire

Wildfires in Scotland are getting bigger, last longer. Ultimately this requires a more significant response.

Since 2010 there have been eight wildfires recorded which have lasted more than five days. All eight of these incidents have been since 2018. In that same time, there have been 15 wildfires lasting two to five days. Incidents of this duration involve hundreds of staff and resources, mainly our on call staff in rural communities.

We know that wildfires are becoming larger in scale, burning for longer periods of time and requiring a more significant volume of emergency response. This is damaging to the environment and causes significant disruption to local communities.

Due to the impact of climate change, we are seeing milder, wetter winters and drier, warmer summers. The expansion of vegetation growing seasons and changes in land management practices in Scotland are creating more fuel for wildfires, so we expect this trend to increase.

WILDFIRES are classified as outdoor fires with more than **1,000 square metres** of burned area.

2,500

wildfires since 2010

average of 178 each year

Flooding

Flooding incidents have increased steadily over the past decade and as the impact of climate change is predicted to intensify, we anticipate this trend to continue.

More than 280,000 homes and buildings are at **RISK OF FLOODING** in Scotland; with an additional 110,000 properties at risk by 2080.*

In 2023, we witnessed the impact of Storm Babet, in which people sadly lost their lives and communities in the north east were devastated by flooding.

This type of large-scale incident presents a significant demand on our service, local and specialist national crews, and requires the deployment of hundreds of staff from across Scotland to the affected areas.

We must ensure that we have the resilience and the correct equipment in place to respond effectively.

* Scottish Environment Protection Agency (SEPA) reference: www.sepa.org.uk/data-visualisation/nfra2018/

15,000
flooding incidents
attended since 2013-14

3.2 Matching resource to risk

We have spent years building our knowledge of changing community risk across Scotland through the development of our Community Risk Index Model (CRIM).

This model considers historical incident data and captures information about the people we serve, including where they are located, the types of buildings and environments they occupy and the way that nature may impact them.

This helps us to identify where our stations and appliances should be based to best meet current risks and keep communities safe.

The modelling we have done has shown that some stations and appliances are not in the right places to meet risk and demand.

Our knowledge of risk will help to inform where we need to locate stations, how we crew our appliances and how we operate from our stations.

3.3 Our people

The success of SFRS is down to our staff. Our firefighters, operations control, fire enforcement officers, community action teams and support staff are all dedicated to keeping Scotland safe.

We want all our staff to receive the highest quality of training which equips them with the skills, expertise and values the public expect.

For operational staff we want to invest in more training sites and more instructors across Scotland to better prepare our staff to deal with the modern risk and challenges.

We also need to work harder to make SFRS representative of the communities we serve.

Diversity is important in creating a workplace where everyone feels welcome and included. Having a diverse workforce has been proven to improve decision making and performance.

We are committed to improving diversity and building the leadership and culture to ensure that SFRS is a great place to be for everyone.

We also need to do more to support our on call firefighters. On call firefighters respond to emergencies via a pager but often have other jobs. There are significant challenges with our on call system and as our communities change, we cannot recruit enough to crew appliances in remote and rural areas.

While this is not unique to Scotland, our geography means that we rely heavily on our on call firefighters. This model needs to be sustainable so that communities can remain resilient. To do this we need to consider what response and – more importantly – prevention activities could better serve these communities.

We need
£60m each
year
to bring our buildings
and equipment up
to standard

3.4 The state of our estate

Many of our ageing buildings are no longer fit for purpose and require urgent action. It will require significant investment to make them safer and more suitable and we must find a way to rectify this. Doing nothing is not an option.

In 2018 Audit Scotland described our backlog in capital spend requirements as “insurmountable”. That means we will never be able to modernise all our buildings and vehicles without additional investment or changing how we work.

Our capital funding has remained at £32.5million for the last seven years. We have received an additional £10million for 24/25 but as a minimum we need at least £60million each year to bring our buildings and equipment up to standard. We are also spending more money on repairs as the condition and suitability of our estate continues to deteriorate.

We have 14 fire stations with Reinforced Autoclaved Aerated Concrete (RAAC) panel issues.

This was identified in 2019 and we took measures to protect our staff and operations, however we have been unable to repair or replace the stations and this requires a permanent solution.

We need £60m each year to bring our buildings & equipment up to standard.

3.5 Contamination risk to firefighters

There is growing evidence of the health risks associated with exposure to a range of contaminants for our firefighters.

Firefighters' mortality rate from all cancers is 1.6 times higher than the general public,

and firefighters are developing cancer at higher rates and at younger ages.*

The safety of our staff is paramount, and we continue to work with the Fire Brigades Union (FBU) and other representative bodies to reduce contamination risk for our firefighters.

We have undertaken a substantial review of how our appliances, staff and personal protective equipment (PPE) are decontaminated during and following an incident. We know that some of our buildings do not have appropriate decontamination provisions and, in some cases, limited welfare facilities.

To mitigate this risk, specialist decontamination wipes have been supplied to all fire appliances and training centres; a station zoning system has been trialled to limit contaminant spread; and our medical tests now include enhanced cancer screening questions.

But we know there is more we must do. Further investment is needed, particularly in relation to creating proper decontamination facilities in our stations.

4

INVESTING IN CHANGE

We recognise that the need to modernise as a service and address the issues with our estate requires investment.

But this comes against a backdrop of economic and financial challenges for the whole public sector in Scotland. SFRS is not immune to this. We face pressures in both our resource and capital budgets so we must find ways to better use our resources.

4.1 Balancing our budget

Our budget is set annually by the Scottish Government and we have a legal duty to deliver a balanced budget.

The Scottish Government's Resource Spending Review published in May 2022 predicted our budget will remain the same for the next three years.

In 2023, the SFRS Board approved an initial savings plan across the whole organisation.

This included the temporary withdrawal of 10 second or third wholetime fire appliances for an initial 12-month period. This decision was supported by data and modelling from our CRIM which identified the appliance withdrawals that would have the least impact on emergency response times.

However we need to make permanent changes to move forward.

In December 2023, the Scottish Government increased our budget by £13.6million for 2024-25, from our budget allocation at the start of 23/24 and increased capital investment by £10.3million.

We need to plan beyond 2025 and ensure we are a sustainable organisation that is able to continually improve and invest in the services we provide. This is why we are seeking your views.

This budget increase gives us an opportunity to look at how we best use our staff, equipment, estate and fleet over future years to make sure we develop and improve for years to come.

5

WHAT CHANGES COULD WE MAKE?

These are some of the areas we think could change to use our resources differently and invest in developing our services.

5.1 Developing the firefighter role

We are committed to working in partnership with our staff and trade unions to develop the role of the firefighter in Scotland to take on wider prevention and emergency response activities.

To achieve this, we would need to agree a new employment contract and role of firefighters with their representative bodies. We have an 'agreement in principle' with the Fire Brigade's Union (FBU) but this would need additional funding to fully implement.

We would also need to invest further in training and equipment to support our firefighters to take on any new roles.

We believe that diversifying the role of firefighters could provide additional support to meet the needs of local communities. For example, we could provide an emergency medical response and support the most

vulnerable in our communities. The benefits to the people of Scotland in working closer with our public service partners could be significant.

Building upon our success in delivering preventative activities and interventions, we believe that we could go beyond the traditional role of the fire service and further enhance our partnership working. This could improve wider community outcomes, reduce demand on partners services and ultimately reduce the risk to the most vulnerable within Scotland's communities.

We also want to be a leader in reforming how our public services are delivered. An example of this would be to build on our current approach of sharing premises with our partners. This provides a more integrated delivery model that reduces the need for separate buildings while providing the services that communities need and the facilities that staff deserve.

5.2 Changing where our stations and appliances are based

The location of our community fire stations and fire appliances across Scotland has not changed significantly over time.

As we outlined in section 3.2, we know that some of our stations are not located in the best places to meet the current risks faced in communities.

There are potential options to change where our stations and appliances are located. This could involve merging stations in similar geographical locations to better reflect risk and demand.

Merging or moving stations would allow us to better use our resources elsewhere in the Service and invest in new stations where required.

By changing our footprint, we can reduce our running costs, reduce our capital backlog and potentially generate income from sites being sold.

The construction of new buildings would also help to address issues with contamination and suitable welfare facilities while providing staff with a newer, modern workplace.

5.3 Changing how and when we staff our resources

Our wholetime firefighters are split across five groups (watches). This is called the 5 Watch Duty System (5WDS) and allows us to provide permanent crews at our wholetime stations 24 hours a day, seven days a week.

Our on call (retained) firefighters respond to emergencies via a pager but often have other jobs while carrying out these duties. They also undertake training and carry out community safety and prevention work.

We also have a number of on call (volunteer) stations and Community Response Units (CRUs) who respond to specific types of incident via a pager system.

We currently have 23 stations which operate using a mixed duty system arrangement.

This is where a station has more than one pumping appliance – typically two pumping appliances and/or a specialist vehicle. One pumping appliance is crewed by wholetime

firefighters on the 5WDS whilst the other pump is crewed by on call firefighters who respond from their home or primary workplace.

We also have one community fire station which combines a wholetime and day duty crewing model.

The day duty system and other alternatives mean appliances are crewed based on data which shows when they are needed.

A mix of duty systems is common elsewhere in the UK.

There may be some areas where changing our duty systems would be appropriate to meet the risk and demand. This could allow staff to be deployed into other risk critical areas such as training and prevention.

5.4 Changing how we attend emergencies

Our crewing model – which is the number of firefighters in appliances that attend an emergency – is another area we could explore for change.

Different models are used throughout the UK and there could be options to change the crewing arrangements for different appliances in individual stations.

We could also adopt bespoke measures to increase availability in other areas. For example, blended crewing, where on call firefighters can be temporarily posted to wholetime stations to ensure appropriate levels of crewing are maintained or wholetime firefighters are deployed to on call stations to fill short-term crew or skills shortages.

5.5 Rationalising our corporate buildings

Our corporate buildings provide working space for both uniformed and support staff.

We have already closed our West Service Delivery Area Headquarters (HQ) at Hamilton after the site was designated as surplus to requirements.

The closure of this site will save approximately £500,000 in annual running costs with future potential for capital receipt following the sale of the corporate building.

There is similar potential to achieve further savings by closing additional sites in other parts of the country.

6 SUMMARY AND NEXT STEPS

Scotland has changed and so must its fire and rescue service.

We have analysed the changing community risk and we know that some of our stations and appliances could be better located. At the same time, many of our ageing buildings are also no longer fit for purpose and require urgent action to make them safer and more suitable.

Through our Strategic Service Review Programme (SSRP), we want to address those challenges and free up or redistribute our resources to invest in other areas such as training, innovation and prevention.

To achieve this, we may need to consider changes to where our stations and appliances are based; and how and when we staff our resources.

So we want to hear your views on what you want from your fire service now and in years to come.

We are engaging with communities across Scotland to find out what people think of the potential changes we have outlined in this document and what the future role of the Service could be in communities.

To share your views please complete our online survey. You can also fill out the questionnaire on [page 21](#) and send it to: SFRS.PublicInvolvement@firescotland.gov.uk

You can also return a copy of the questionnaire to: FREEPOST SFRS Communications, Scottish Fire and Rescue Service, Westburn Drive, Cambuslang, G72 7NA.

If you require this information in a different format, such as braille or audio, please email: SFRS.PublicInvolvement@firescotland.gov.uk

Once we have completed this exercise at the end of June 2024 we will review all the feedback we have received.

We will then use this feedback to help develop options for change before running a full public consultation exercise later this year.

QUESTIONNAIRE

SHAPING OUR FUTURE SERVICE: YOUR SAY

1. About you

How would you best describe yourself?

(Tick the one that best applies)

- | | |
|---|--|
| <input type="checkbox"/> SFRS staff – operational | <input type="checkbox"/> Other public organisation (e.g., NHS) |
| <input type="checkbox"/> SFRS staff – support | <input type="checkbox"/> Third sector / voluntary organisation |
| <input type="checkbox"/> Member of the public | <input type="checkbox"/> Community group |
| <input type="checkbox"/> Other emergency service | <input type="checkbox"/> Trade Union / Representative bodies |
| <input type="checkbox"/> Business / commercial sector | <input type="checkbox"/> Other: |
| <input type="checkbox"/> Local authority | |
| <input type="checkbox"/> Elected member | |

 Please use this text box to give other description.

2. Our people

Section 2 of the 'Shaping Our Future Service: Your Say' document describes the variety of incidents within SFRS and the different responsibilities we have.

To ensure the highest possible levels of community and firefighter safety, SFRS needs to have firefighter duty systems with the right staffing levels available to attend incidents at the time of day when there is most risk. Do you:

- | | |
|---|---|
| <input type="checkbox"/> Agree strongly | <input type="checkbox"/> Disagree |
| <input type="checkbox"/> Agree | <input type="checkbox"/> Disagree strongly |
| <input type="checkbox"/> Neither agree nor disagree | <input type="checkbox"/> Prefer not to answer |

 Please use this text box to give us any additional thoughts on this.

3. Service priorities

The 'Shaping Our Future Service: Your Say' document (Section 3) outlines the need for SFRS to change. From the list below, please select UP TO FOUR issues that you feel should be priorities for SFRS.

Please RANK THESE IN ORDER with 1 being the most important.

Rank	Issues
	Crews should be based in areas where there is more risk and demand.
	SFRS should have the right resources (i.e. fire appliances) in the right place – based on analysis of risk.
	SFRS should work alongside communities to build resilience and better prepare for significant events, including flooding and wildfire.
	Fire stations should have dignified changing facilities for firefighters.
	Reassurance that any changes won't make me or my family less safe.
	There should be a visible SFRS presence near where I live.
	SFRS should undertake prevention work to protect the most vulnerable in communities
	SFRS needs to demonstrate best value for public money.
	SFRS should strive to reduce its carbon footprint wherever possible.

4. Investing in change

Section 4 of the 'Shaping Our Future Service: Your Say' document outlines the need for SFRS to make better use of our resources.

One way we can do this is to work in partnership with other public bodies (e.g., Police Scotland and others) to explore how we can provide better value for the public.

Do you:

- Agree strongly
- Agree
- Neither agree nor disagree
- Disagree
- Disagree strongly
- Prefer not to answer

 Please use this text box to give us any additional thoughts on this.

5. Our appliances

Section 5.2 of the 'Shaping Our Future Service: Your Say' document (Changing Where Our Stations and Appliances Are Based) outlines why we need to review where our appliances are located. For communities to be safe, we need to have the right resources in the right place.

SFRS should have fire appliances located based on risk in local communities. Do you:

- Agree strongly
- Agree
- Neither agree nor disagree
- Disagree
- Disagree strongly
- Prefer not to answer

 Please use this text box to give us any additional thoughts on this.

6. Where we're located

Section 5.2 of the 'Shaping Our Future Service: Your Say' document (Changing Where Our Stations and Appliances Are Based) outlines why we need to review where our fire stations are located. To do this, we must consider how the communities we serve have changed and are continuing to change.

6a) SFRS should have fire stations located based on risk in local communities. Do you:

- Agree strongly
- Agree
- Neither agree nor disagree
- Disagree
- Disagree strongly
- Prefer not to answer

 Please use this text box to give us any additional thoughts on this.

6b) SFRS should consider sharing premises with partners (e.g., Scottish Ambulance Service, Police Scotland and local authorities) to provide a better service for our communities. Do you:

- Agree strongly
- Agree
- Neither agree nor disagree
- Disagree
- Disagree strongly
- Prefer not to answer

 Please use this text box to give us any additional thoughts on this.

7. Our role in local communities

Our Prevention and Protection work can help reduce the risk of fires and other potentially life-threatening situations. It can also help us better plan for events such as flooding and wildfires.

7a) SFRS should work with community partners (e.g., local authorities, and others) to further reduce these risks. Do you:

- Agree strongly
- Agree
- Neither agree nor disagree
- Disagree
- Disagree strongly
- Prefer not to answer

 Please use this text box to give us any additional thoughts on this.

7b) SFRS should contribute towards Net Zero by, for example, reducing our own carbon emissions. Do you:

- Agree strongly
- Agree
- Neither agree nor disagree
- Disagree
- Disagree strongly
- Prefer not to answer

 Please use this text box to give us any additional thoughts on this.

8. Consulting with our communities

SFRS may wish to hold a future public consultation on some of the issues detailed below. Please tell us to what extent you think the public should be consulted on each issue.

Change Proposal	The public should be fully consulted	The public don't need to be consulted, but should be informed	The public don't need to be consulted	Unsure
Changes to firefighter role (e.g., to include emergency first aid responder)				
Modernisation / upgrade of a fire station(s)				
Closure of a fire station				
Moving a fire station to a new location				
Permanent removal or relocation of a fire appliance(s)				
Changes to firefighter duty systems				
Sharing locations with other partners (e.g., Police, Ambulance, local authorities.)				
Building a new fire station				

9. Any other comments

Please give us any other comments that SFRS should take into account when considering the future of the Service.

10. Equality monitoring

Why are we asking for equality information?

We collect equality information to help us plan and deliver services as part of our Equality Duties (Equality Act 2010). The information you provide:

- helps us assess and improve our performance;
- helps us to identify and address the needs of our employees and the communities of Scotland
- ensures we are interacting in a balanced way with people with protected characteristics as defined by the Equality Act (2010).

Do you need to answer every question?

No. The information you provide is voluntary and anonymous, but by answering as many questions as possible, it will give us a better understanding of who we are engaging with and what we need to do to continue to be as inclusive as possible.

Data Protection and Privacy Notice

Scottish Fire and Rescue Service (SFRS) is committed to protecting your personal information. The processing of personal data is covered by the General Data Protection Regulation 2018 and Data Protection Act 2018.

Further information on how SFRS will process this data can be found at www.firescotland.gov.uk/publications/document/?id=7586
