## 8. What is a Polling District?

A Polling District is a geographical sub-division of an electoral area. For voting purposes each Parliamentary constituency and every local government ward is divided into smaller polling districts. North Ayrshire Council, for example, has 10 wards which are split into 82 polling districts.

**NOTE:** The Returning Officer is **NOT** proposing any changes to Polling Districts as part of this review. The Returning Officer is, however, proposing changes to some Polling Places i.e. the building where electors cast their vote.

## 9. What is a Polling Place?

A Polling Place is the building and adjoining land where voters cast their ballots in elections. For example, a Community Centre, Church Hall or School can be designated as a Polling Place.

## 10. What is a Polling Station?

A Polling Station is the place where voting actually takes place. There may be more than one Polling Station in a Polling Place.

## 11. Why are you changing some Polling Places?

There are various reasons, for example, some buildings currently used as Polling Places may no longer be available. The Returning Officer is also keen that, **as far as possible**, schools should remain open on polling day so as not to disrupt education provision. However, this **may not always be possible** due to a lack of alternative buildings in the immediate vicinity or due to the size and layout of the school.
